

U.S. Department
of Transportation

National Highway
Traffic Safety
Administration

1200 New Jersey Avenue, SE
Washington, DC 20590

MAR - 4 2013

Dear Prospective Purchasers:

Attached please find a copy of the February 2013 *Relative Collision Insurance Cost Information Booklet* provided by the National Highway Traffic Safety Administration (NHTSA), an agency of the U.S. Department of Transportation. Pursuant to NHTSA's regulation in Title 49 of the Code of Federal Regulations, Part 582, *Insurance Cost Information Regulation*, NHTSA is required to make available to prospective purchasers information regarding comparative insurance costs, based on damage susceptibility and crashworthiness, for makes and models of passenger cars, sport utility vehicles, light trucks, and vans.

As a result of Public Law 112-252 signed into law by Congress on January 10, 2013, the requirement for passenger motor vehicle dealers to distribute this information to prospective buyers has been repealed. Therefore, dealerships will no longer be responsible for reproducing and maintaining copies of the booklet in their showrooms for prospective purchasers of new vehicles. However, this booklet can still be downloaded and printed from the NHTSA Web site at:

<http://www.nhtsa.dot.gov/>.

From the NHTSA website, click on the "Vehicle Safety" tab, then choose the "Vehicle-Related Theft" category, on that page, under the "Additional Resources Panel", click on "2013 Comparison of Insurance Costs".

Sincerely yours,

O. Kevin Vincent
Chief Counsel

**Comparison of Differences in Insurance Costs
for Passenger Cars, Station Wagons/Passenger Vans,
Pickups, and Utility Vehicles
On the Basis of Damage Susceptibility**

**February 2013
DOT HS 811 738**

Comparison of Differences in Insurance Costs for Passenger Cars, Station Wagons/Passenger Vans, Pickups, and Utility Vehicles on the Basis of Damage Susceptibility

The National Highway Traffic Safety Administration has provided the information in this booklet in compliance with Federal law as an aid to consumers considering the purchase of new vehicles. The booklet compares differences in insurance costs for different makes and models of passenger cars, utility vehicles, light trucks, and vans on the basis of damage susceptibility for the vehicle. However, it does *not* indicate a vehicle's relative safety for occupants.

The following table contains the best available information regarding the effect of damage susceptibility on insurance premiums. It was taken from data compiled by the Highway Loss Data Institute (HLDI) in its December 2012 *Insurance Collision Report*, and reflects the collision loss experience of passenger cars, utility vehicles, light trucks, and vans sold in the United States in terms of the average loss payment per insured vehicle year for model years 2010-2012. NHTSA has not verified the data in this table.

The table presents vehicles' collision loss experience in relative terms, with 100 representing the average for all passenger vehicles. **Thus, a rating of 122 reflects a collision loss experience that is 22 percent higher (worse) than average while a rating of 96 reflects a collision loss experience that is 4 percent lower (better) than average.** The table is not relevant for models that have been substantially redesigned for 2012, and it does not include information about models with insufficient claim experience.

Although many insurance companies use the HLDI information to adjust the "base rate" for the collision portion of their insurance premiums, the amount of any such adjustment is usually small. It is unlikely that your total premium will vary more than 10 percent depending upon the collision loss experience of a particular vehicle. If you do not purchase collision coverage or your

insurance company does not use the HLDI information, your premium will not vary at all in relation to these rankings.

In setting insurance premiums, insurance companies mainly rely on factors that are not directly related to the vehicle itself (except for its value). They mainly consider driver characteristics (such as age, gender, marital status, and driving record), the geographic area in which the vehicle is driven, how many miles are traveled, and how the vehicle is used. However, some companies adjust their premiums for personal injury protection and medical payment coverage if the insured vehicle has features that are likely to improve its crashworthiness, or ability to protect occupants from injury or death, such as air bags. Different insurance companies often charge different premiums for the same driver and vehicle. Therefore, to obtain complete information about insurance premiums, you should contact insurance companies or their agents directly.

Test data relating to vehicle crashworthiness is available from NHTSA's New Car Assessment Program (NCAP). NCAP test results demonstrate relative frontal, side, and rollover crash protection in new vehicles. Information on vehicles that NHTSA has tested in the NCAP program can be obtained on the information label on vehicles at new car dealers, by calling the agency's toll-free Auto Safety Hotline at 888-327-4236, and through the NHTSA Web page at: www.safercar.gov.

GMC	Savana 1500 cargo	93

Relative results are computed for individual model years and then combined through a weighted average to produce the three year relative result. The all-passenger-vehicle "100 =" value is given for reference only and can only be used as a rough estimate to convert from relative to absolute results

Minimum requirement for reporting: 1,000 vehicle years of exposure or 100 claims.

Note: Every model represents over 1,000 insured vehicle years and at least 100 claims. The experience for previous or discontinued models from 2010 – 2012 is included in the class averages.
